

“List of Companies Accepting Technical Visits (industrial tours) ”

Aichi-Nagoya: a hub of manufacturing aggregates various technologies ranging from traditional industries such as ceramics and textiles to advanced industries such as automobiles, aerospace, and robotics. After receiving a large volume of requests from MICE event participants wishing to visit local companies, the Aichi-Nagoya MICE Promotion Council has created this list. This list contains information on companies which have their head office, plant, or place of business in Aichi Prefecture, and accept technical visits. To apply, please contact the host company directly (contact information in the “Reservations” section of each company’s profile).

<Precautions / Legend >

: Link to official websites

Visit hours : Visits are accepted from Monday to Friday unless otherwise specified.

Websites : Links to Contact Forms, etc. *Some web sites link to Japanese websites.

Supported language: Unsupported languages may be accepted if you bring an interpreter along with you.

Number One

Company whose share of production or sales is Number One in Japan and overseas.

Only One

Company whose products or technology is unavailable elsewhere. Also, company that handles custom-made products and technology.

Japan First (Industry First)

Company that is the first in Japan (or in the industry) to handle the product or possess the technology.

Long-established, traditional company
